

Exotic Animal Critical Care Nutrition

HERBIVORE - CARNIVORE - OMNIVORE - PISCIVORE

**First Semi-Elemental Diet System designed
for a wide variety of critically ill exotic animals**

EmerAid is uniquely formulated to help:

Faster energy

Via highly digestible blend of fats, proteins, and carbohydrates

Better healing

Via rapid absorption of hydrolyzed protein and essential amino acids

Stops diarrhea

With prebiotics, balanced fiber and hydrolyzed nutrition

High palatability and stress-free feeding

Readily lapped up from a syringe or bowl

Tube/crop feed easily

Feed smaller volumes due to high energy density and easily administer due to smooth texture

Order through VNS www.vetnutritionalsolutions.com.au

Designed for
